Venue Fit™ Ultrasound System

Made for Your Point of Care

Simple. Fast. Precise.

For Your Point of Care

A small but efficient point of care ultrasound system, Venue Fit™ is a simple, fast and precise partner for your point of care.
Designed to fit your practice, fit your space and fit your needs, the streamlined—yet powerful—Venue Fit features the smallest footprint in the Venue family while still maintaining the features you've come to expect. Designed to handle the busywork so you can focus on your patients, the Venue Fit is ready when and where you are.

MORE PROBES AVAILABLE.
CONTACT US FOR MORE INFORMATION.

Easy to reach probes

Smart cable management puts probes safely up top and cables out of the way and off the floor

Long-lasting power

Batteries can provide scan times of up to one hour

Small and powerful

Without losing features, the smallest footprint in the Venue family

Easy to clean

Smooth and seamless surface supports infection control efforts

Customized for your needs

Configurable cart to keep two active probes accessible and in good condition

At your side

Unit detaches from adjustable cart and allows for use on table top or standard VESA® connection

Reliable support

Venue Fit is backed by a multi-year warranty[5]

Designed to simplify the complex

Venue Fit ultrasound systems are built specifically for Point of Care medicine across the facility. They are streamlined to help users of different departments and experience levels confidently conduct patient exams.

AI-enabled tools support your confident decision-making

AI-resources based on synthesized data and proprietary algorithms simplify manual processes such as measuring and finding B-lines, helping ensure consistency from user to user.

Documentation tools streamline exams

Protocol management and easy documentation tools help users conquer busywork by readily providing the information they need, reducing the need to manually type findings.

Broad probe portfolio for exceptional image quality

Venue Fit features a wide variety of linear, curved, and cardiac transducers that are designed for a multitude of specialties and interchangeable* across systems.

A common platform ensures a consistent experience

All systems are built on one platform with the same interface to ensure familiarity and simplify training across your facility.

Built-in teaching assistance facilitates learning

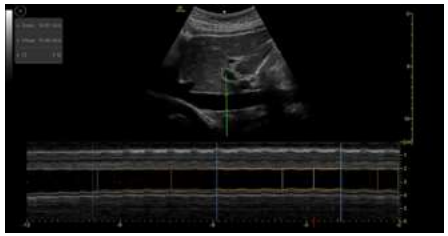
Scribble assists training with a touch-operated pointer and free-drawing capabilities that can also be visible on an external monitor or shared screen.
The **MSK Tool Kit** provides reference images to make documentation easy and guides novice users in scanning the correct anatomy.

Touch, pinch, swipe

No buttons. No knobs. A familiar touch screen with a simple, clear and intuitive interface works even with gloves or screen covers.

Work smarter not harder with AI-proven tools

Helping drive consistency from user to user (whether one is an ultrasound novice or expert), Venue Fit features AI-enabled resources that help clinicians work smarter and more efficiently. Utilizing proprietary algorithms, we synthesize data from numerous patients to ensure accurate calculations for clinical confidence.



Shock toolkit

Facilitates shock evaluation by focusing on key organs linked to patient status: the heart, lungs, and inferior vena cava.

Associated rapid assessments:

Auto IVC

Measure IVC collapsibility or distensibility accurately and automatically.

Equivalent to an expert user's ability 87% of the time.[1]

Auto VTI

The VTI trending function helps clinicians quickly visualize the trend so the next course of action can be determined.

Experience up to 82% time savings.[2]

Auto B-Lines

Calculate overall lung score in one step. You can also use it with Lung Sweep to highlight B-lines and display the frame with the most B-lines per rib space.

As highly reliable as visual counting.[3]

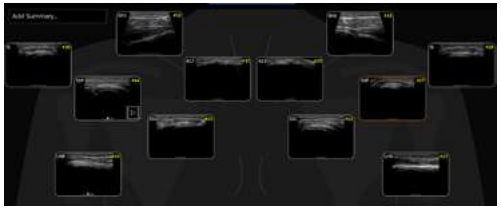
cNerve

During the scouting phase, use cNerve to identify the nerve landmark and see it highlighted on the image. Helps detect and track the nerve in 99% of cases while scanning or reviewing a stored clip.[4]

Simplify your workflow

Venue Fit systems help eliminate busywork at the Point of Care. Easy documentation and protocol management tools reduce keystrokes, facilitate exam comparison, and streamline image organization for efficient review.

MSK Tool Kit



MSK Tool Kit

Shoulder Diagram Simplifies shoulder exam documentation and follow-up by fast-tracking image labeling and image storage. Also facilitates patient therapy response by giving you the whole picture over treatment time.
Reference image provides anatomy markups to assist novice users in scanning the correct anatomy.
Bilateral mode helps you to view the opposite side of the same zone for comparison.

Real-time documentation

Lung Diagram

A single view diagram of anatomical lung segments with one click image storing. Enables calculation of an overall Lung Ultrasound Score to help response to therapy.

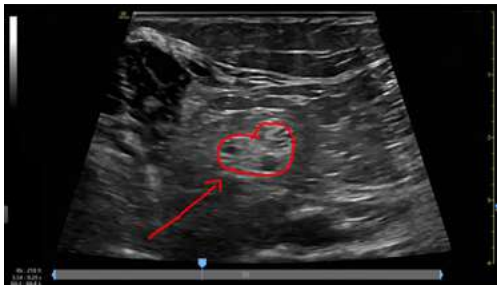
Renal Diagram

Simplifies hydronephrosis documentation and follow-up. Minimizes typing with labeling tools.

eFAST Diagram

Allows users to assess and document patient status, from internal bleeding to pneumothorax, with up to an 80% reduction in keystrokes.[2]

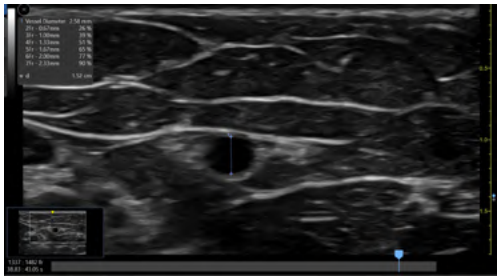
Scribble



Scribble

Assists training with a touch-operated pointer and free-drawing capabilities.

Measurement Feature



Catheter to Vessel Ratio

Supports you in selecting the appropriate sized catheter based on vessel diameter.

Made for Your Point of Care

Inspired by the needs of Point of Care physicians,
Venue Fit supports a wide range of environments.

Critical Care

AI-enabled tools, an intuitive interface, a compact footprint, and large screens optimize Venue Fit for your quick decision-making and bedside interventional procedures

Learn more

Emergency Medicine

A straightforward design, AI-enabled Auto Tools and nimble maneuvering help emergency room physicians quickly triage patients and determine care pathways.

Learn more

Musculoskeletal

Clear and effective tools help MSK practitioners assess tendons, muscles and joints and manage patient progress during a course of treatment.

Learn more

NICU & Pediatrics

The Venue Fit AI-enabled tools for pediatrics^ enables fast and confident diagnostic scans without ionizing radiation for evaluation of the tiniest patients.

Learn more

Perioperative Anesthesia

Simple, fast and precise tools support your clinical decision making so you can provide the best clinical outcomes for your perioperative patients.

Learn more

Regional Anesthesia

Excellent image quality along with the tools needed to view the nerve, guide the needle, and ensure proper solution delivery, helping you provide the best clinical outcomes for your patients.

Made for security

SonoDefense is GE Healthcare's multi-layer strategic approach to cybersecurity and patient data privacy for ultrasound, and designed to:

- Keep the ultrasound machine safe and functional in the face of cyberthreats
- Protect patient data on the machine from unauthorized access
- Enable you to successfully implement HIPAA and security policies, while still managing productive daily workflows

Defense-in-depth strategy

SonoDefense is designed for maximum security protection with a defense-in-depth strategy that incorporates security controls deployed in multiple layers. This approach enhances security by protecting the system against any particular attack using several independent methods.

SonoDefense

Seamlessly integrates into your facility's security ecosystem

Reduces potential points of attack

Blocks unused communication channels

Disables unneeded services in the Windows® 10 operating system

Limits what can be run

- Customizable, role-based access
- Federated identity management
- Session management
- Auditing
- Secure remote access

Customizable patient data encryption at rest and in transit

LEARN MORE ABOUT THE VENUE FAMILY

1. Supporting evidence for Venue and Venue Go is documented in DOC2391130. Supporting evidence for Venue Fit is documented in DOC2454794.
2. Auto VTI can provide up to 90% reduction in keystrokes and take up to 82% less time than manual method calculations, as performed by experts. Based on GE Internal study with Venue Go DOC2254811.
3. A recent study found the Auto B-lines tool to be comparable to and as highly reliable as visual counting performed by experts. ShortJ,Acebes C, Rodriguez-de-Lema G, et al. Visual versus automatic ultrasound scoring of lung B-lines: reliability and consistency between systems. Med Ultrasonography 2019, Vol 21 no1, 45049 DOI: 10.11152/mu-1885.
4. Claims based on reading study- DOC2725435 Venue family R4 cNerve reading study.
5. Please consult your local GE Healthcare representative for warranty term information in your region.
